

Configuring Export to Nerdio Manager

Get Nerdio REST API Credentials

1. Login to Nerdio Manger.
2. Then on the navigation menu select Settings - Integrations

3. Under REST API select show

4. The credentials required for the next part will be displayed, leave the page open

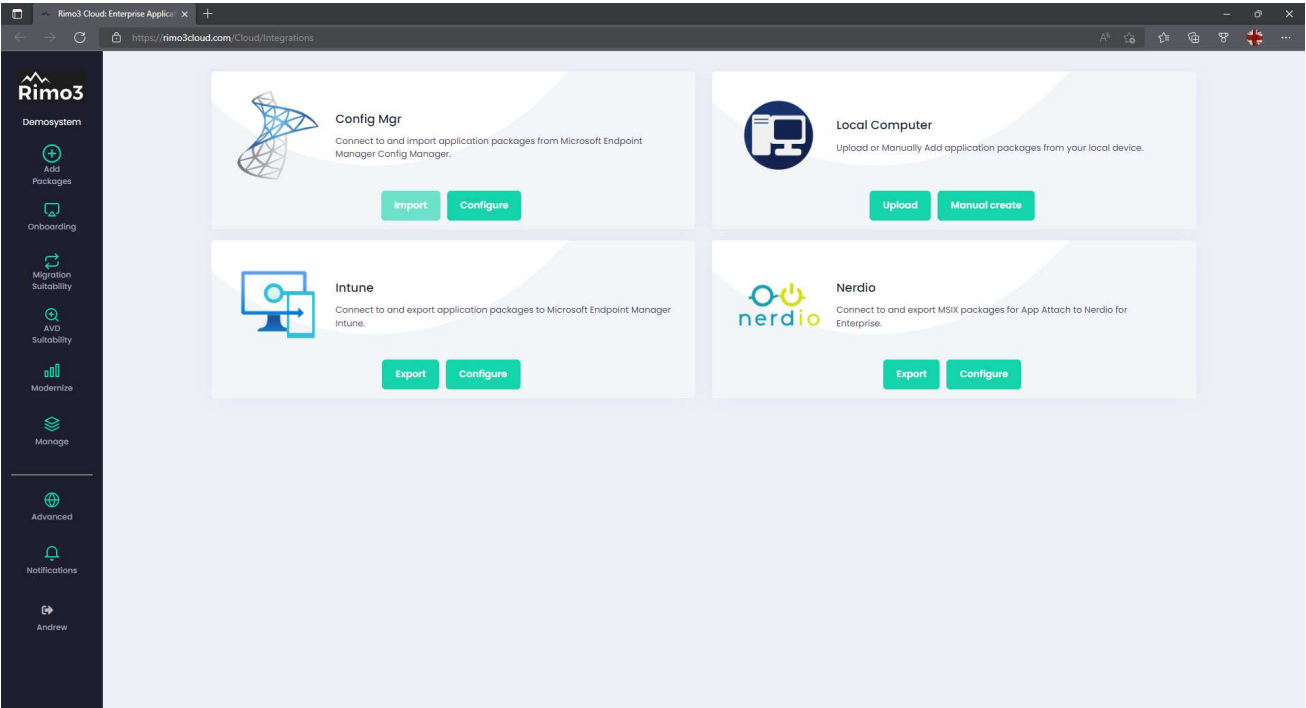

! INFO

If you don't know the Secret you might have to regenerate it, however this may affect any other services using the Nerdio REST API.

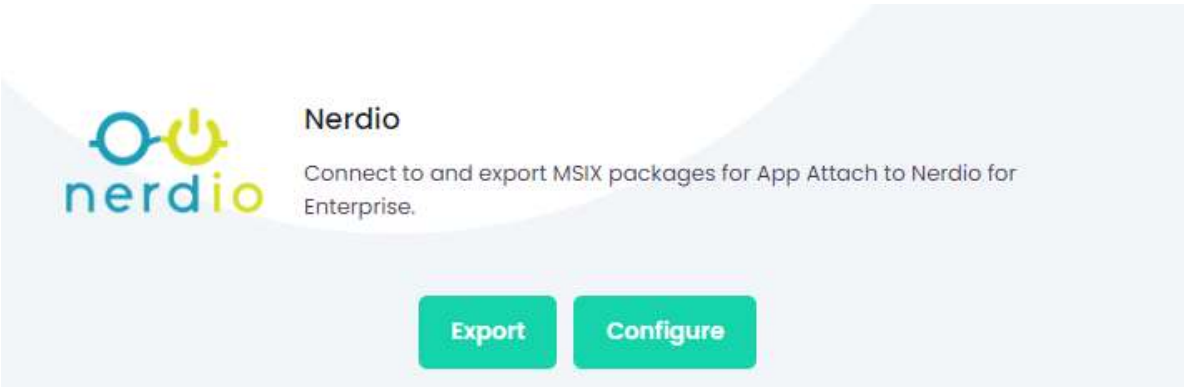

Configuring your Rimo3 Cloud Tenant

To complete the configuration of Nerdio Manager in your Rimo3 Cloud tenant you will need the details from Step 4 above:

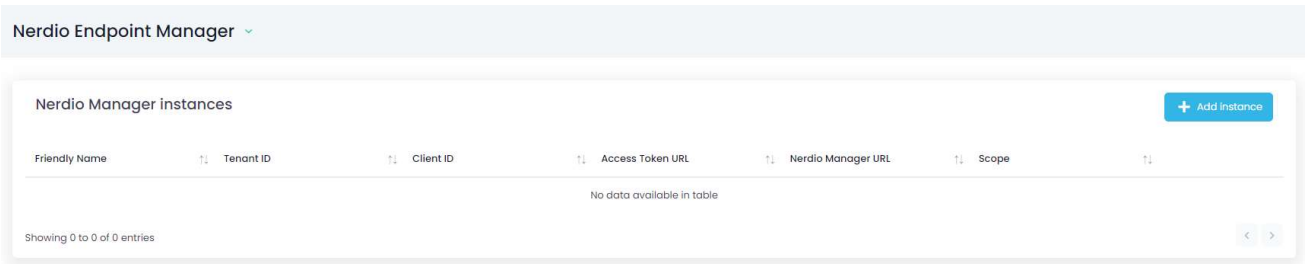

1. Login to your Rimo3 tenant with an account that has Admin rights
2. Click on Advanced – Integrations to open the [Integrations Hub](#)

3. Select Configure on the Nerdio card

4. On the Nerdio instances card select + Add instance

5. On the Add Nerdio Manager instance dialog complete all the fields and click on Save:

Add Nerdio Manager instance
